Weather Defence launch: Further resources

Dear Valued Customer,

Siniat is now the proud Australian supplier of [Weather Defence](#), the rigid air barrier used behind facade cladding systems. Weather Defence helps to create a weathertight building, allowing internal trades to start work earlier and reduce the construction cycle.

Weather Defence is Class 4 vapour permeable and can achieve outstanding building airtightness. It is the only compliant rigid air barrier in Climate Zones 6, 7 & 8 currently available in Australia.

The following products are now available to order:

Material code	Product description
4082431	Weather Defence board 13 x 1200 x 2400
4084645	38mm Weather Defence Screws (box of 1000)
4084646	42mm Weather Defence Screws (box of 1000)

Many of you recently attended an online webinar training session on Weather Defence, and our channel account managers are also conducting face-to-face training sessions. Below are the links to various resources to assist you further:

- [Sales pack](#);
- [Weather Defence brochure](#);
- [Weather Defence product data sheet](#).

A marketing campaign to promote Weather Defence will roll out over the coming months.

The Siniat Customer Service team or your channel account manager will assist with any other questions you may have.

We are looking forward to working with you to bring this award-winning product to the market!

Kind Regards,

The Siniat Team

Etex Australia (Siniat), 31 Military Road, Matraville, NSW 2036, Australia, 1300724505
