

mastaglide

finishing compound

mastaglide is a premixed air drying heavy weight compound designed for the final coat over plasterboard joints and fastener heads. Suitable for both hand trowelling and mechanical tools, **mastaglide** can be used over **mastabase** and **mastalongset** bedding cements.

performance

Body

Good body, particularly suited for application with mechanical tools in larger projects. Easy to trowel, gliding over the joint with little effort.

Drying

Quick drying means less waiting before sanding, with sufficient time available for fine edges when feathering.

Colour

Light in colour when first applied. When **mastaglide** dries, the colour changes so sanding is started only when the joints are completely dry.

Sanding

Easy to sand with a scratch free finish.

Sustainable

Low VOC meeting sustainable building project requirements.

key benefits

- smooth trowelling
- great sanding
- low shrinkage

product information

product size	20kg bucket
type	Heavy weight air drying premixed paste.
drying time	Allow 24 hours. Drying time varies depending on temperature and humidity.
system usage	✓Final coat ✓Standard ✓Fire rated
voc	<50g/L
approximate density	1.65 g/cm ³

application

- **mastaglide** is ready to use for hand trowelling. For mechanical tools, if necessary add clean tap water in small amounts and mix until desired consistency is achieved.
- Excessive thinning may cause cracking or increased shrinkage. Do not mix with any other material.
- Maintain a minimum 10°C working temperature during application and drying.
- Sand with 180 to 220 grit sand paper.
- A three coat paint system must be used in accordance with AS/NZS 2311 *Guide to the painting of buildings*. This consists of a sealer undercoat and two coats of paint.
- Both the quality of the paint and how it is applied have a large effect on the finished appearance of the plasterboard. The paint manufacturer's instructions for application must be followed. To achieve the best result it is strongly recommended that each coat of the three coat paint system be roller applied.

optimise product performance by:

- Firmly closing the lid to prevent the compound from drying out.
- Washing tools before product dries and hardens.

Quality
ISO 9001

All Siniat products have been developed to meet the specific needs of the Australian market. Products manufactured in Australia comply with quality systems certified as complying with AS/NZS ISO 9001:2008 and meet the requirements of AS/NZS 2588, Gypsum Plasterboard.

The following Siniat products have been independently certified by Global GreenTag to GreenRate Level A: **mastashield**, **fireshield**, **fireshield h**, **soundshield**, **watershield**, **spanshield**, **multishield**, **curveshield**, **opal**, **trurock** and **trurock hd**. Compliance certificates are available on siniat.com.au.

All Siniat plasterboard and metal products are available on the Siniat Carbon Neutral Opt-In program to help you meet your sustainability goals. Visit siniat.com.au to find out more.
