

trackflexible

metal system

trackflexible System provides the ultimate solution for creating curved framing of walls, partitions, bulkheads, archways and columns. **trackflexible** is the most convenient and cost effective method of creating your curved wall needs. The **trackflexible** is formed easily into your desired shape by hand.

All Siniat metal components are corrosion resistant for Australian conditions. **trackflexible** are made from 'Next Generation' Zinalume AM150 coated G300 steel for extra strength and corrosion resistance.

key benefits

- saves time and money with less labour
- simple screw fixing method
- highly customisable creating endless design opportunities
- standard pack sizes for ease of delivery and handling
- safe to install
- fully tested solution with AS/NZS4600:2018 certification
- certified deflection fastener solution available upon request

revolutionary design

trackflexible's unique design ensures smooth curves by virtue of the precision- engineered crumple-link, which deforms evenly and progressively between segments thus avoiding flat spots throughout the entire curvature of the desired bend.

Unlike other systems, there is no need to fix every segment to the floor, wall or ceiling whilst creating the desired curve. Nor do you have to hammer down each track segment to link them into place to secure the track in position.

product information

name	width (mm)	height (mm)	bmt (mm)	length (mm)	weight (kg/pc)	product code	pieces per pack
flexible	51	42	0.55	2400*	1.35	TFLEX51-2400	10
	64	46	0.55	2400	1.58	TFLEX64-2400	10
	76	42	0.55	2400	1.71	TFLEX76-2400	10
	92	42	0.75	2400	1.86	TFLEX92-2400	8

* Minimum order quantities and lead times apply

application

1. Select suitable lining in accordance with desired curved radius
2. Mark out desired final location of track in situ
3. Simply form the desired shape with **trackflexible** on the ground or over your head
4. Either screw or crimp through the **trackflexible** side strap to quickly lock in shape position required
5. Secure fasteners through track at each stud point ensuring these are fit for purpose and to the required performance rating specified
6. Secure the studs to the **trackflexible** and install sheeting

Quality
ISO 9001

All Siniat products have been developed to meet the specific needs of the Australian market. Products manufactured in Australia comply with quality systems certified as complying with AS/NZS ISO 9001:2008 and meet the requirements of AS/NZS 2588, Gypsum Plasterboard.

The following Siniat products have been independently certified by Global GreenTag to GreenRate Level A: **mastashield**, **fireshield**, **fireshield h**, **soundshield**, **watershield**, **spanshield**, **multishield**, **curveshield**, **opal**, **trurock** and **trurock hd**. Compliance certificates are available on siniat.com.au.

All Siniat plasterboard and metal products are available on the Siniat Carbon Neutral Opt-In program to help you meet your sustainability goals. Visit siniat.com.au to find out more.

Disclaimer

Products manufactured and systems designed by Etex Australia Pty Ltd and branded Siniat, are produced in accordance with the Building Code of Australia and relevant Australian Standards. Information in this document is to be used as a guide only and is subject to project approval as many aspects of construction are not comprehensively covered. It is also the responsibility of the project to determine if Siniat's products and systems are suitable for the intended application. Etex Australia Pty Ltd will not be held responsible for any claims resulting from the installation of its products or other associated products not in accordance with the recommendations of the manufacturer's technical literature or relevant Australian Standards.
